

biographical information

Barbara Harrison
Vice President, Offsets & Emerging
Chevron New Energies

Barbara Harrison is the vice president, Offsets & Emerging, Chevron New Energies. In this role, she is responsible for growing Chevron's Offsets and Emerging businesses, turning strategy into action to deliver on Chevron's higher returns and lower carbon ambitions.

In her prior role, Barbara was the general manager of Value Chain Optimization (VCO), International Fuels and Lubricants (IF&L) in Asia. She was responsible for strategic planning for IF&L and optimizing crude supply and products placements within Chevron's refining and marketing systems across Asia and Australia. Prior to this, she was general manager, Planning and Change Management Office, in Corporate Strategic Planning, responsible for Chevron's business planning process, secretary of the Management Committee and managed the Change Management Office, which supports the deployment of the Strategic Imperatives across the corporation.

Barbara previously held several positions of increasing responsibility across Chevron's Downstream and Chemicals business including, Manufacturing, Strategy, VCO and Retail. Barbara started her career at the Richmond Refinery in California as a process engineer in 2001. She earned her Bachelor of Science degree in Chemical Engineering from University College Dublin in Ireland.

Barbara is married with three children, two daughters and a son.
